

Sanitation and Hand Hygiene in Emergencies

WHO-based knowledge-base brief for SehatAI Pakistan

Purpose

WHO/UNICEF guidance addresses hand hygiene in households, public and institutional community settings, including during health emergencies.

Key themes

- Hand hygiene is an important public-health measure for reducing diarrhoeal disease and acute respiratory infections.
- Reliable access to water and hand-hygiene products supports effective hand hygiene.
- Facilities should be maintained so water, soap or appropriate hand-hygiene products remain available and usable.
- Health promotion and clear communication help people understand why, when and how to clean their hands.

Use in SehatAI

Use this document for hygiene, sanitation and emergency preparedness messages. Keep advice practical and consistent with the source.
